

Data Flow Diagram

Date	1 July 2026
Team ID	—
Project Name	India's Agriculture Crop Production Analysis
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
	External Entity	A person, organization, or external system outside the project that sends or receives data (e.g., Ministry of Agriculture, Data.gov.in, Weather API).
	Process	An activity or function that transforms incoming data into outgoing data (e.g., Data Cleaning, Trend Analysis, Visualization).
	Data Store	A place where data is stored for later use (e.g., Crop Production Database, Weather Data Store, Master Data).
	Data Flow	The movement of data between external entities, processes, and data stores, labeled with what data is being passed.

India's Agriculture Crop Production Analysis – Architectural Flow Diagram

The diagram below illustrates how agricultural data from multiple sources is ingested, processed, analyzed, visualized, and stored to deliver actionable crop production insights.
