

Communication

Date	7 July 2026
Team ID	
Project Name	India's Agriculture Crop Production Analysis
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Slack / WhatsApp	Core Developers & Data Analysts	Review daily task distribution, track data processing progress, code sync steps, and resolve quick development blockages.
2	Progress Update	Weekly	Google Meet	Full Team & Project Mentor	Present dashboard updates, data analysis insights, visualizations, and plan upcoming sprints.
3	Issue / Bug Discussion	As Needed	GitHub Issues / Discord	Developers & Data Analysts	Debug data processing issues, visualization errors, API integration problems, or rules-based analytics mismatches.
4	Stakeholder Review	Bi-Weekly	Microsoft Teams	Full Team & Evaluators	Share intermediate milestones, gather feedback on charts, reports, and insights, and align with grading rubric requirements.
5	Final Demo Rehearsal	Once	Google Meet	Full Team & Mentor	Perform an end-to-end dry run of the dashboard flow, data filters, reports, and verify presentation assets.
6	Documentation Sync	As Needed	Google Docs	Full Team	Collaborate on documentation, ensure README, user guide, and project reports are complete and updated.

India's Agriculture Crop Production Analysis

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Project Collaboration & Coordination 	Daily (Micro updates) Weekly (Status review) Milestone-based (Planning & Review)	Slack (Daily Updates) Google Meet (Meetings) Google Drive (Docs & Reports) GitHub (Code & Issues)	Data Engineers / Data Scientists / Developers / Agriculture Domain Experts / Technical Writers	 Collaborate concurrently on crop data ingestion, analysis pipelines, dashboards, reports, and project documentation.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	 Coordinating collaborative development syncs due to fluctuating daily schedules of individual team members.	 Standardized an explicit micro-update baseline rule inside the shared Slack channel for text status notifications.
2	 Explaining abstract technical data processing workflows, model outputs, or state handling loops clearly via text messages.	 Adopted instant screen-sharing huddles on Google Meet / Discord to provide direct interactive walkthroughs of data pipelines, charts, and local issues.
3	 Consolidating feature improvement feedback items efficiently without losing critical action points.	 Utilized structured GitHub Repository Projects (Kanban boards) to log, track, assign, and mark review action notes completed.
